

Problem Solver

OVERVIEW	Third-year Industrial Engineering student with a passion for AI-driven Automation and Business Solutions. Specializes in "Vibe Coding" and rapid prototyping, leveraging LLMs to bridge the gap between complex operational needs and functional software. Proven ability to architect and deploy autonomous AI agents that drive real efficiency.
SOLUTIONS	Dynamic Investment Portfolio Dashboard (200+ Users) Product Website - Eliminated manual tracking chaos by engineering a data-driven SaaS product that centralizes all portfolio data. Developed automated ELT pipelines via API integrations, leveraging GA4 to optimize features based on real investor needs. Hospitality Business Automation Google Apps Script & JavaScript - Engineered and deployed an autonomous operational system for a real-world vacation rental business, eliminating 99% of manual administrative overhead through custom API integrations and automated workflows. Private AI Career Agent Python, Streamlit & Gemini API - Architected a Generative AI full-stack agent utilizing Gemini API to automate job matching, featuring dynamic model fallback and a custom JSON persistence layer with an interactive CRM dashboard for data-driven career optimization.
EDUCATION	B.Sc. in Industrial Engineering and Management 2023-2028 "Braude" Academic College of Engineering, Karmiel. Burlington English 2022 Advanced English Studies. TAMAR Scientific High School , Golan Heights 2014-2018 Specialization in Electronics.
PROFESSIONAL EXPERIENCE	Supermarket Manager 2022-2023 Managed all store operations, including ordering and receiving supplies, inventory control (FIFO), and optimizing processes to ensure efficiency.
MILITARY SERVICE	Commander \ Operations Sergeant "GOLANI Brigade" 2019 - 2022 Operations Manager: Managed company operations center, overseeing 140 soldiers, prioritizing multiple real-time tasks, and making risk-based decisions under pressure. Command: Led a team of 12, focusing on mission execution and performance under pressure.
SKILLS & LANGUAGES	AI & Automation: Python (Streamlit), LLM Implementation (Gemini), Agentic Workflows, Prompt Engineering, API Integrations, Make.com. Data Analytics & Engineering: SQL, Advanced Excel, Google Analytics 4 (GA4), ELT Pipelines, Google Sheets (Advanced Logic), JavaScript, Apps Script. Languages: Hebrew (Native), English (Excellent).
